

1.2m Tripod Mount for Metal Roofs

11MM-TRIPOD-M

For the Best

The TRIPOD-M is a 1.2m two-piece antenna mount specially designed for metal or tin roofing use. Galvanised in Australia for the highest quality protection against the harsh Australian environment; this is especially important in coastal areas where salt corrosion quickly destroys cheaply coated or unprotected metals. Quick and easy installation by existing roof screws or addition of self-tapping roof screws via slotted fastening points in the base plate.

Features and Benefits

- » Designed for mounting on metal roofing
- » Australian galvanised finish for optimum corrosion protection and peace of mind
- » Two-piece kit consisting of a base plate with a 1.2m mast
- » Quick and easy installation by using existing roof screw points
- » Sturdy and robust design for maximum durability
