

2m RG6 Quad-shield Flylead with Adaptors DA-FL26

The DA-FL26 is a professional-grade 2m RG6 quad-shield fly lead. It features 'F' type compression connectors with integrated silicon 'O' rings to help eliminate dust or moisture ingress. Its operating frequency range of 0.5-3000MHz is perfect for CATV and satellite networks. The FL26 has two 'F' female to IEC (PAL) male adaptors to connect different interfaces easily.

Features and Benefits

- » 2m RG6 lead pre-terminated with 'F' type fittings, including two 'F' Female to IEC (PAL) Male adaptors
- » High-quality compression connectors allow for use in both satellite and CATV connections
- » Connectors are made from high-quality nickel-plated brass for long-life corrosion resistance
- » Suitable for use to 3000MHz with up to 100dB of screening effectiveness
- » Coaxial cable provides four layers of shielding for extra protection from ingress
- » Integrated O-ring to create a watertight seal to prevent any unwanted ingress
