

## Patchcord Minders

AFL's 1RU horizontal and vertical patchcord minders offer an effective way to manage and route fibre optic and copper cabling within any standard 19" equipment rack.

These Patchcord Minders are robust in construction with durable plastic clips that can be rotated into both vertical and horizontal positions.

1RU Patchcord Minder

Vertical Patchcord Minder Bracket

### Features and Benefits

- The panels are made using high quality materials for long term reliability and performance
- The clips have rounded edges, to maintain proper bend radius and work well with all types of fibre optic and copper cabling
- The clips can be easily mounted to the panel in both a horizontal and vertical orientation.
- The horizontal panel has 2 knockout sections to allow patching through to the rear of the rack. Each knockout has a brush strip fitted behind the opening to help manage air flow within the rack
- The vertical panel can be mounted to the front or side of the rail

### Applications

- Organising network cabling requiring hubs, switches and patch panels within a data or server rack.

## Specifications and Ordering Information

Part Number	FRE-1RU-PCMNDR	FRE-1RU-PCM-V
Description	1RU Patchcord Minder	Vertical Patchcord Minder Bracket
Unit Dimensions (mm) (W x H x D)	482 x 44 x 100	130 x 44 x 106
Weight (g)	520	150
Fibre Count Capacity per clip	Exceeds 24 copper & 72 duplex fibre patch leads	
Material & Colour	Powder coated 1.5 mm mild steel – Charcoal grey Polycarbonate plastic – Jet black	
Applicable Specifications	Flame retardant UL94 V-0	
Accessory Kit	Standard accessories include: cable management clips, brush strips, fixing bolts, cage nuts and an installation guide.	Standard accessories include: 2 clips, 1 panel, cage nuts and bolts.
