Adhesive Medium Wall Tubing. (CJS-MWT)

Features/Applications

MWT is a Medium wall heat shrinkable tubing with hot melt adhesive, having properties of excellent insulating, environmental sealing, and resistant to impact and abrasion. It is designed for applications to seal and protect electrical splices, cable terminations and Joints kits where electrical insulation and water proof are required. 3:1 shrink ratio allows it easily fit over irregular shape and large connectors.

- Resistant to UV-radiation
- High electrical insulation
- Superior mechanical property
- Minimum fully recovery temperature: 120°C
- Standard color: Black

Note: Always order a large size that will shrink snugly over the component. Wall thickness will be less if tubing recovery is restricted during shrinkage.
