Product Information

Product Details

Product Description

Bi-Metal Link 6mm Aluminium to 4mm Copper

For stranded sector and circular stranded aluminium to stranded copper cable.

The CABAC range of bi-metal crimp links are made to Australian dimensions and can be crimped with Australian standard tooling. They are friction welded from the highest quality aluminium (99.6% pure) and copper (99.9% pure). The barrels are coated with jointing compound, and the links are individually packed in plastic bags.

A full range of standard sizes are available however, virtually any link can be machined to order at short notice.

Technical Specifications

Cable Size Large End (mm2):	95
Cable Size Small End (mm2):	50
Lugs and Links - Material:	Bi-Metal
