

Metal Glands - Unarmoured IP68

IP68 RATING

CABAC's Metal Gland is a unique product that is very different from traditional metal glands.

- IP68 rating - the highest possible
- Superior strain relief
- Large cable range with each gland
- Nickel plated brass for corrosion protection
- Incorporates a unique 'camera shutter' principle which protects the cable
- Fully insulated by plastic insert
- Neoprene seal for fluid tightness
- Metric thread to suit Australian requirements
- PG thread for motors etc. from Europe

Installation is extremely simple, just pass the cable through the assembled gland and tighten gland nut until cable is secured. No need to disassemble the gland.

The perfect gland for unarmoured PVC, XLPE and other synthetic cables.
