

# Earthing Compound

Item Code: 3018108  
 Part Number: MISBENTONITE

Earthing compound with high moisture retention for reducing soil resistivity when backfilling earth electrodes. Extends service life of copper earth rods in highly acidic or alkaline soils. Absorbs and retains water, increasing contact area with the earth and reducing resistance.

## General

Unit of Measure	Each
Material	Bentonite Clay

## Dimensions

Net Weight	25 kgs
